## SUMMARY

Software engineer with 3+ years building scalable backend systems and cloud-native platforms for 1M+ users. Expertise in microservices architecture, API design, Kubernetes orchestration, and DevOps automation. Strong focus on system design, performance optimization, and security best practices.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, TypeScript, Python, Bash, SQL

**Backend & Frameworks:** Spring Boot, Node.js, Express.js, REST APIs, GraphQL, WebSocket, Microservices

**Frontend:** React, Angular, Next.js, Tailwind CSS

**Cloud & DevOps:** Kubernetes, Docker, AWS, GCP, ArgoCD, Crossplane, CI/CD, GitOps

**API & Integration:** Software AG (webMethods), Apigee, WSO2, REST, GraphQL

**Databases:** PostgreSQL, MySQL, MongoDB, Redis (Caching)

**Tools:** Git, GitHub, VS Code, Jira, Maven, Swagger, JWT Authentication

## PROFESSIONAL EXPERIENCE

### Nagarro, Senior Engineer

July 2025 – Present

- Architecting cloud-native Internal Developer Platform using Crossplane, ArgoCD, and Kubernetes enabling self-service infrastructure provisioning and GitOps workflows for development teams
- Building Spring Boot backend services for platform orchestration, automation, and policy enforcement to streamline developer experience and reduce infrastructure deployment time
- Collaborating with SRE teams to design scalable, secure infrastructure abstractions implementing platform reliability best practices

### Nagarro, Engineer

January 2024 – June 2025

- Built RESTful APIs using Java and Spring Boot for Abu Dhabi Securities Exchange (ADX) stock trading platform serving 1M+ users with PostgreSQL data layer and NASDAQ market data integration
- Implemented real-time stock updates via WebSocket protocol and optimized performance using Redis caching layer
- Decoupled microservices architecture using AWS SQS for asynchronous messaging with event deduplication via Redis ensuring data consistency across distributed systems
- Integrated Microsoft CRM for end-to-end customer, trade, and complaint management workflows
- Proactively identified and resolved security vulnerabilities maintaining zero critical issues and reducing high/medium risk exposures by 60+ percent
- Collaborated with cross-functional Agile teams (UI/UX, QA, DevOps) for continuous platform improvements

### Nagarro, Associate Engineer

July 2022 – December 2023

- Developed scalable backend services using Java Spring Boot and Node.js improving application interoperability and system performance
- Managed version control and release workflows using Git ensuring smooth team collaboration and deployment processes

### Infosys, Systems Engineer Intern

February 2022 – May 2022

- Engineered complaint management system for municipal operations supporting multiple departments with role-based access control for Citizens, Department Members, Mayors, and Admins
- Tech Stack: Java, Spring Boot, Angular 10, REST APIs, MySQL, Maven, Git

## PROJECTS

### Custom Portfolio

byluc.in

- Next.js, TypeScript, Tailwind CSS, Markdown
- Built responsive portfolio with dual persona toggle, blog with Markdown support, project showcase with filtering, and SEO optimization using Next.js App Router for fast performance

### Merchant Management App

— Spring Boot, PostgreSQL, JWT, Swagger

- Developed RESTful API for merchant management with JWT authentication, complete CRUD operations, password encryption, data validation, and Swagger API documentation

### Arduino CLI Docker

— Python, Docker, AWS S3, Arduino CLI

- Created Dockerized compilation tool for Arduino sketches with per-project core/library support, flexible board targeting, AWS S3 binary upload, and automatic dependency installation

## EDUCATION

### PSIT College of Engineering, Kanpur, India

Bachelor of Technology in Computer Science and Engineering

July 2018 – July 2022

## CERTIFICATIONS

- IBM: webMethods API Management Basic
- The Linux Foundation: Open Source Software Development, Linux & Git Specialization
- Kennesaw State University: Cybersecurity - Developing a Program for Your Business
